

# Sweet Seeds®

Feminised Seeds

2016  
*Your sweetest moment*

# Sweet Seeds®

At Sweet Seeds we are proud to present for another year our feminised aromatic varieties, which are the result of a painstaking work of selection and breeding.

In this 2016 season, at Sweet Seeds we keep celebrating our 10th anniversary and we want to thank you for these 11 years with the special gift of 1 and 2 seeds in every pack of 3 and 5 seeds respectively. You can check the length of this promotion at [WWW.SWEETSEEDS.COM](http://WWW.SWEETSEEDS.COM).

This season we continue with our autoflowering r-evolution and we present a new 4th generation autoflowering strain SWS57 (Blow Mind Auto®). Regarding photoperiod-dependent varieties we present SWS58 (Crystal Candy®), a strain with an exquisite aroma and stunning resin production.

With collective bulk purchasing and members of cannabis clubs in mind, in the 2015 season we presented new packaging formats of 25 and 100 seeds. This season we enlarge the number of varieties that are available in these formats. All the 25 seed packages have a price of 100€ (4€ per seed) and the 100 seed packages sell for 350€ (3,50€ per seed).

In the 2014 season we introduced our "Sweet Mix Auto" package, with the purpose of offering high-quality autoflowering seeds at an affordable price, fit to the present period of financial crisis. To complete our offer of high-quality affordable seeds, in the 2015 season we also presented the new "Sweet Mix Feminised" package, with a mix of 10 seeds randomly selected among all the photoperiod-dependent strains from the Sweet Seeds collection. The "Mix" packages are both available at the price of 35€ (3,5€ per seed), making it probably the most economic high-quality feminised seeds in the market.

Thanks!

Friendly greetings from the Sweet Seeds team

**Glossary:**  
**Photoperiod-dependent varieties:** Varieties that flower depending on the number of hours of light that they receive.  
**Autoflowering (aka Automatic):** Varieties that start flowering when they reach to a specific lifetime, regardless of the hours of light that they receive.  
**F1 hybrid:** The first resulting generation of the hybridization between two different and stable varieties.  
**S1:** First resulting generation from the self-pollination of an individual.  
**F1 Fast Version®:** Photoperiod-dependent varieties with fast flowering. F1 hybrids between photoperiod-dependent and autoflowering varieties.

## Blow Mind Auto®

4th generation autoflowering strain. In the development of this variety we have used the famous "Cordobesa" Amnesia Haze clone. To introduce the autoflowering trait in this genetic we have used selected genetic lines of our variety SWS24 (S.A.D. Sweet Afgani Delicious Auto®), which contributes with a background of sweet and musky aromas to the cross.

This variety features a pleasant, deep and complex aroma of incense, with sweet and musky tones, complemented with lemony citric hints, shades of wood and dried fruit.

Tall-stemmed autoflowering strain, very resinous and productive.

**Variety SWS57**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8-9 weeks from germination  
**Height:** 60-120 cm

3s+1s 21,90 € 5s+2s 35,90 €

## Cream Mandarin XL Auto®

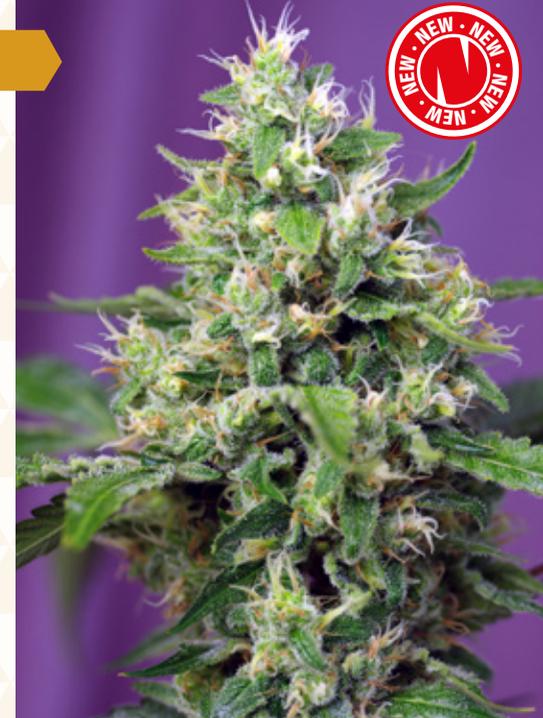

Autoflowering strain with tall stature and high production. This 4th generation autoflowering strain is the resulting hybrid from the cross between selected specimens of our variety SWS29 (Cream Mandarin Auto®) and a Súper Tai '98 elite clone.

The genetic coming from the Súper Tai '98 elite clone contributes with interesting sativa characteristics to this hybrid, such as bigger size, but also soft aromatic and spicy tones with hints of wood and nuts. The so much appreciated Cream Mandarin Auto® genetic contributes with traits from the indica side, such as high flower and resin production, but also sweet and fresh aromas with tones of citric fruits of the mandarine type.

**Variety SWS55**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9 weeks from germination  
**Height:** 110-150 cm

3s+1s 23,90 € 5s+2s 39,50 €

## Jack 47 Auto<sup>®</sup>

3rd generation autoflowering. This hybrid is the result of a cross between a Jack Herer Auto from the Sweet Seeds' R & D Department and our elite clone of AK 47. Probably the most potent autoflowering variety available in the market.

A very productive autoflowering plant with abundant, compact and very resinous buds. The aroma and taste of this strain is sweet, fresh, lemony and with hints of incense.

**Variety SWS31**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9 weeks from germination  
**Height:** 50-120 cm

**3s+1s** 29,90 € **5s+2s** 48,90 €

## Big Devil #2 Auto<sup>®</sup>

3rd generation autoflowering strain. First genetic evolution of SWS15 (Big Devil Auto<sup>®</sup>). A big sized feminized autoflowering strain. In response to the demand of our clients who asked for bigger autoflowering plants, we developed this genetic capable of reaching to a height of 1 to 1,5 m.

More productive and more aromatic than its previous version, this plant produces compact resinous buds with numerous side branches. Sweet aromas with hints of incense and Skunk.

**Variety SWS20**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9 weeks from germination  
**Height:** 100-150 cm

**3s+1s** 25,00 € **5s+2s** 42,00 €

## Sweet Cheese Auto<sup>®</sup>

3rd generation autoflowering variety. This hybrid is the result of crossing a selected strain of SWS23 (Fast Bud #2 Auto<sup>®</sup>) and a SWS19 (Sweet Cheese<sup>®</sup>) elite clone from the Sweet Seeds' R&D Department. The resulting hybrid has been backcrossed twice with the Sweet Cheese<sup>®</sup> clone in order to establish the Cheese aroma.

This variety produces a long, thick, central bud which is very compact and resinous. It has retained the intense, very sweet aroma characteristic of Sweet Cheese<sup>®</sup>, with mature spicy cheese overtones and soft hints of lemon.

**Variety SWS33**  
**Autoflowering: 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 60-110 cm

## Cream Caramel Auto<sup>®</sup>

3rd generation autoflowering strain. New autoflowering version of our SWS04 (Cream Caramel<sup>®</sup>). This is the result of the cross between our best 2nd generation autoflowering strains and Cream Caramel<sup>®</sup>.

Superior quality auto with dense buds and great resin production. Pungent sweet aroma with earthy tones. Fast flowering, strong effect and superb hybrid vigor.

**Variety SWS22**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 40-90 cm

**3s+1s** 20,00 € **5s+2s** 33,00 € **25s** 100 € **100s** 350 €

## Sweet Skunk Auto

3rd generation autoflowering variety. Sweet Seeds has created this hybrid as a tribute to this classic, well-loved family of cannabis. It is a hybrid cross between an Early Skunk elite clone and an automatic version of Critical Mass from the Sweet Seeds' R&D Department.

The resulting hybrid has been backcrossed twice with the Early Skunk elite clone. This fast flowering variety is one of the most productive and resinous varieties, and produces dense buds covered with trichomes. It has an intense skunk aroma with very sweet undertones perfumed with a hint of spices.

**Variety SWS34**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 7½ weeks from germination  
**Height:** 60-90 cm

**25s** 100 € **100s** 350 € **3s+1s** 14,50 € **5s+2s** 23,90 €

## Black Jack Auto<sup>®</sup>

3rd generation autoflowering strain. Autoflowering version of our SWS01 (Black Jack<sup>®</sup>). This is the result of the cross between our 2nd generation SWS24 (S.A.D. Sweet Afgani Delicious Auto<sup>®</sup>) and our Jack Herer elite clone.

Superior quality auto with dense buds and great resin production. Pungent sweet aroma with earthy tones. Fast flowering, strong effect and superb hybrid vigor.

**Variety SWS21**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9 weeks from germination  
**Height:** 40-110 cm

**3s+1s** 24,00 € **5s+2s** 40,00 €

## S.A.D. Auto®

### Sweet Afgani Delicious

3rd generation autoflowering strain. New autoflowering version of our SWS02 (S.A.D. Sweet Afgani Delicious S1®). This is the result of the cross between our best 2nd generation autoflowering strains and S.A.D. Sweet Afgani Delicious S1®.

Superior quality auto with dense buds and great resin production. Pungent sweet aroma with earthy tones. Fast flowering, strong effect and superb hybrid vigor.

**Variety SWS24**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 40-90 cm

3s+1s 18,50 € 5s+2s 30,70 €

## + Speed Auto

3rd generation autoflowering variety. This hybrid is the result of crossing an automatic Critical Mass strain from the Sweet Seeds' R&D Department, chosen for its fast flowering and agreeable, intense aroma, with a selected strain of very fast flowering SWS25 (Speed Devil #2 Auto®).

This autoflowering variety has been developed by searching for the genetic traits responsible for very fast flowering, and is ready to harvest only 7 weeks after germination. It produces thick buds covered with aromatic resin. Sweet and fruity aromas with hints of yeast and cheese.

**Variety SWS27**  
**Autoflowering 100%**  
**Indoor Yield:** 350-500 g/m<sup>2</sup>  
**Indoor/Outdoor Harvest:** 7 weeks from germination  
**Height:** 50-90 cm

3s+1s 20,90 € 5s+2s 34,50 €

## Cream Mandarine Auto®

3rd generation autoflowering. This is the result of the development of a very special strain from SWS22 (Cream Caramel Auto®) with very high production and pronounced sweet citric aromas of the mandarin type.

This curious and exquisite Cream Caramel Auto® strain has been hybridized with an elite clone of our SWS06 (Ice Cool®) to strengthen the mandarin citrus aromas. In the end of flowering many plants acquire purple and reddish tones.

**Variety SWS29**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9 weeks from germination  
**Height:** 50-110 cm

3s+1s 23,90 € 5s+2s 39,50 €

## Big Devil XL Auto®

3rd generation autoflowering. This hybrid is the result of crossing our SWS20 (Big Devil #2 Auto®) with a Jack Herer auto from the Sweet Seeds' R&D Department. The height of her previous version is increased and plants reach between 110 and 160 cm, with numerous large side branches. The thickness and density of the buds is also increased and they turn up to be spectacularly loaded with aromatic resin. Incense aroma with a citric hint of lemon.

**Variety SWS28**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 9½ weeks from germination  
**Height:** 110-160 cm

## Green Poison Auto®

3rd generation autoflowering variety. This hybrid is the result of crossing a selected strain of SWS20 (Big Devil #2 Auto®) and a SWS14 (Green Poison®) elite clone. The resulting hybrid has been backcrossed twice with the original Green Poison® clone in order to establish the Green Poison® aroma and taste.

The hybrid's aroma and taste have been firmly-established and are very agreeable and intense, with sweet fruity tones and mild Skunk undertones. This variety features exceptional flower and resin production, and a potent, long-lasting effect.

**Variety SWS30**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 60-100 cm

3s+1s 22,50 € 5s+2s 36,90 €

## Sweet Trainwreck Auto

4th generation autoflowering strain with a high stature. This is the resulting hybrid from the cross between 3rd generation autoflowering lines that were selected for their high stature and a very famous Trainwreck elite clone which is used in many medical dispensaries from the USA. The result is a strain with a high stature and branching typical of mostly sativa autoflowering strains. On the other hand, this strain features fast flowering, dense flowers, high production of trichomes and an intense sweet fruity aroma with citrus tones characteristic of mostly indica plants. A very well balanced autoflowering genetic that gathers the desired characteristics of both indica and sativa strains.

**Variety SWS47**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 60-120 cm

3s+1s 22,50 € 5s+2s 36,90 €

## Mohan Ram Auto®

3rd generation autoflowering variety. This is the resulting hybrid of the cross between a selected strain of automatic White Widow from the Sweet Seeds' R&D Department and a selected strain of SWS24 (S.A.D. Sweet Afgani Delicious Auto®).

This easy-to-grow autoflowering strain shows great hybrid vigor and produces thick buds that are covered with aromatic resin with a potent, long-lasting effect. It features an exquisite aroma which is very fruity, fresh, and floral with sweet musky undertones.

**Variety SWS32**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 50-100 cm

**3s+1s** 19,90 € **5s+2s** 32,80 €

## Killer Kush Auto

4th generation autoflowering strain. Autoflowering version of one of the most famous strains from the West Coast of USA. Developed around the year of 1994 in Sunset Beach, South California, and named as Ocean Grow Kush but better known as OG Kush. Our SWS56 (Killer Kush Auto) is the result of the hybridization between a selected 3rd generation autoflowering genetic line leaning to the indica side and an elite clone of OG Kush. The result is a very potent plant with a very fast flowering. This strain produces large and aromatic buds, all covered by a thick layer of trichomes. The aroma is sweet, citric and acid with exotic tones reminiscent of aromas from the Chem Dawg-Diesel family.

**Variety SWS56**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 60-100 cm

**3s+1s** 19,90 € **5s+2s** 33,00 €

## Ice Cool Auto®

4th generation autoflowering strain. This hybrid is the result of a cross between a SWS06 (Ice Cool®) elite clone and a 3rd generation autoflowering genetic line of SWS23 (Fast Bud #2 Auto®). This is an autoflowering strain with an intense and exotic aroma, typical of the Diesel family. Very sweet and spicy, with fresh tones reminiscent of blue cypress aromas.

A very powerful strain with a high bud production, covered with a remarkably aromatic resin that allows for a strong and exciting effect. Our autoflowering representative of the Diesel family.

**Variety SWS46**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8-9 weeks from germination  
**Height:** 50-110 cm

**3s+1s** 24,90 € **5s+2s** 41,50 €

## Dark Devil Auto

100% autoflowering strain. This is the result of the hybridization between one of our most appreciated autoflowering genetics SWS28 (Big Devil XL Auto®) and an exotic autoflowering strain with purple flowers, developed with the collaboration of the R & D Department of the seedbank Buddha Seeds – feminized seeds. The purple characteristic of this strain is inherited from its ancestors from the Chitral region in the Pakistani Hindu Kush, very close to Afghanistan. The purple genetics contribute for a faster flowering period, bringing new sweet aromas and purple colours to our Big Devil XL Auto®. SWS38 (Dark Devil Auto) shows a strong hybrid vigor since germination. Plants grow with the appearance of Indica-Sativa hybrids with a strong main stem and numerous side branches, finishing with a big main cola and multiple smaller buds on the side branches. Resin production is abundant in the flowers and in their surrounding leaves. Sweet and fruity aroma with hints of incense and delightful citrus tones. After harvested and dried the buds gain a very dark purple tone, almost black.

**Variety SWS38 · Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8½ weeks from germination  
**Height:** 80-130 cm · **Purple Flower:** approx. 80% of the specimens

**3s+1s** 24,90 € **5s+2s** 41,50 €

## Fast Bud #2 Auto®

3rd generation autoflowering strain. Evolution of our SWS16 (Fast Bud Auto®). A very productive auto with big buds and plenty of aromatic resin. Extremely vigorous plants producing lots of very strong side branches. Plants reach a height of between 40 and 90 cm.

Strong effect and sweet aromas with exotic tones coming from its Diesel heritage. A very fast autoflowering strain.

**Variety SWS23**  
**Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 7½ weeks from germination  
**Height:** 40-90 cm

**3s+1s** 19,50 € **5s+2s** 32,50 €

## Black Cream Auto

100% autoflowering strain. This is the result of the cross between our most awarded strain SWS04 (original Cream Caramel®), and an exotic purple flowered autoflowering strain, descending from Pakistani Kush ancestors.

This plant looks like an Indica, with a short internodal distance, numerous small branches in the main stem, compact buds and a big main cola. This strain is a great resin producer. SWS37's (Black Cream Auto) aroma is very sweet and fruity, featuring a background of some earthy tones inherited from our Cream Caramel®.

**Variety SWS37 · Autoflowering 100%**  
**Indoor/Outdoor Harvest:** 8 weeks from germination  
**Height:** 60-110 cm  
**Purple Flower:** approx. 80% of the specimens

**3s+1s** 21,90 € **5s+2s** 36,50 €

## Bloody Skunk Auto

100% autoflowering strain. This strain is the result of a cross between our SWS34 (Sweet Skunk Auto) and a selected genetic line of SWS39 (Red Poison Auto) that contributes with the purple flowered feature. The result is a marvelous and aromatic purple flowered strain with a deep Skunk aroma, extremely pleasant and sweet.

The structure of the plant is very similar to the classic Skunk strains, with the shape of a fir and lots of side branches. Large flowers covered with aromatic resin and a huge main cola on top. The flower clusters are very dense and in the course of flowering they get completely covered by resin.

**Variety SWS44**

**Autoflowering 100%**

**Indoor/Outdoor Harvest:** 8 weeks from germination

**Height:** 60-110 cm · **Purple Flower:** approx. 85% of the specimens

3s+1s 19,90 € 5s+2s 33,00 €

## Killer Kush F1 Fast Version®

Feminized and photoperiod-dependent version of one of the most famous strains from the West Coast of USA, developed around the year of 1994 in Sunset Beach, South California, the Ocean Grow Kush, better known as OG Kush. With an ultra fast flowering, our SWS52 (Killer Kush F1 Fast Version®) is the resulting hybrid from the cross between a selected 3rd generation autoflowering genetic line leaning to the indica side and an elite clone of OG Kush.

The result is a very potent plant with a very fast flowering. This strain produces large and aromatic buds, all covered by a thick layer of resin. The aroma is sweet, citric and acid with exotic tones reminiscent of aromas from the Chem Dawg-Diesel family.

**Variety SWS52**

**Indica/Sativa:** 80%/20%

**Indoor Blooming:** 7 weeks

3s+1s 19,90 € 5s+2s 33,00 €

## Red Poison Auto

100% autoflowering strain. Hybridization between one of the most appreciated strains from our catalog SWS14 (Green Poison®), and an exotic purple flowered autoflowering strain, descending from Pakistani Kush ancestors. SWS39 (Red Poison Auto) grows with the appearance of an Indica-Sativa hybrid. It shows a great hybrid vigor from the first stages of growth. The plants develop a strong main stem and long flexible side branches. This strain produces thick dense buds covered with aromatic resin. Taste and aroma are both very pleasant and intense. Sweet and fruity with a soft Skunk background.

**Variety SWS39 · Autoflowering 100%**

**Indoor/Outdoor Harvest:** 8 weeks from germination

**Height:** 60-120 cm

**Purple Flower:** approx. 80% of the specimens

3s+1s 22,50 € 5s+2s 37,50 €

## Sweet Skunk F1 Fast Version®

Feminized and photoperiod-dependent version with an ultra fast flowering of one of the most famous cannabis families of all time, considered nowadays as a classic of cannabis breeding. This strain is the result of the hybridisation between a selected genetic line of our SWS34 (Sweet Skunk Auto) and an Early Skunk elite clone. The F1 hybrid resulting from the cross between the autoflowering and the photoperiod-dependent strains originates a photoperiod-dependent Skunk genetic with a very fast flowering. The aroma of this strain is very sweet and spicy, just like the classic aroma that we usually find within the Skunk family. This strain produces thick buds, loaded with abundant and aromatic resin.

**Variety SWS54**

**Indica/Sativa:** 65%/35%

**Indoor Blooming:** 6-7 weeks

**Outdoor Harvest:** late August to early September

3s+1s 14,90 € 5s+2s 24,50 € 25s 100 € 100s 350 €

## Devil Cream Auto

100% autoflowering strain. This is a polyhybrid resulting from a cross between selected genetic lines of two of our purple flowered varieties: SWS38 (Dark Devil Auto) SWS37 (Black Cream Auto). This strain shows a great hybrid vigor from germination as it is composed of a wide genetic mix. This variety develops the typical structure of an Indica-Sativa hybrid, with a strong main stem, tough side branches and big leaves that end up forming a thick and dense main cola, surrounded by multiple buds on the side branches also with a good calibre and density. Devil Cream Auto produces copious amounts of a very aromatic resin. The aroma is sweet and fruity with hints of incense and lemony citrus tones. The plants grow quite tall for an autoflowering strain, a characteristic inherited from the Dark Devil Auto genes that intervene in the cross. Some individuals can reach a height of more than one metre high, all this in just two months after the germination of the seeds. The resin of this plant has a potent and exciting effect.

**Variety SWS45 · Autoflowering 100%**

**Indoor/Outdoor Harvest:** 8 weeks from germination

**Height:** 70-120 cm

**Purple Flower:** approx. 85% of the specimens

3s+1s 22,90 € 5s+2s 37,90 €

## S.A.D. F1 Fast Version®

Feminized and photoperiod-dependent version with an ultra fast flowering of one of the sweetest and most aromatic strains of our catalogue. This genetic is a hybrid resulting from the cross between a selected genetic line of SWS24 (S.A.D. Sweet Afgani Delicious Auto®) and a Black Domina elite clone selected in 1998. The cross between the autoflowering genetic and the photoperiod-dependent clone produces photoperiod-dependent F1 Hybrids and shortens flowering time by one week.

A strain with very dense buds and a big resin producer. The aroma of this strain is exquisite, very sweet and musky, typical of some Old School Afghan plants.

**Variety SWS53**

**Indica/Sativa:** 90%/10%

**Indoor Blooming:** 6-7 weeks

**Outdoor Harvest:** early September

3s+1s 18,50 € 5s+2s 30,50 €

### Sweet Afgani Delicious

Feminized and photoperiod-dependent version with an ultra fast flowering of one of the sweetest and most aromatic strains of our catalogue. This genetic is a hybrid resulting from the cross between a selected genetic line of SWS24 (S.A.D. Sweet Afgani Delicious Auto®) and a Black Domina elite clone selected in 1998. The cross between the autoflowering genetic and the photoperiod-dependent clone produces photoperiod-dependent F1 Hybrids and shortens flowering time by one week.

A strain with very dense buds and a big resin producer. The aroma of this strain is exquisite, very sweet and musky, typical of some Old School Afghan plants.

## Cream Mandarinine F1 Fast Version®

Attending to the request of our friends and clients we introduce the feminized and photoperiod-dependent version of our much appreciated SWS29 (Cream Mandarinine Auto®). To develop this variety we selected our best Cream Mandarinine Auto® genetic lines. In order to eradicate the autoflower characteristic of the original version and, at the same time, to strengthen the aroma trait, we have hybridized these selected genetic lines with an elite clone of Diesel ancestors featuring tones of aromatic mandarin citrus aromas. Cream Mandarinine Auto® is a strain with a great vigor and with a structure of an Indica-Sativa hybrid. Produces big compact buds fully loaded of aromatic resin.

**Variety SWS50**  
**Indica/Sativa:** 60%/40%  
**Indoor Blooming:** 7 weeks  
**Outdoor Harvest:** early September

**3s+1s** 23,90 € **5s+2s** 39,50 €

## Sweet Cheese F1 Fast Version®

Feminized and photoperiod-dependent version of our SWS19 (Sweet Cheese®) now featuring ultra-fast flowering. This strain is the F1 hybrid resulting from the cross between a selected Sweet Cheese® elite clone and a selected 3rd generation autoflowering genetic line of SWS33 (Sweet Cheese Auto®). This version of Sweet Cheese® preserves the traditional and desired old spicy cheese aroma from the Cheese genetics. It produces long thick buds, which are quite dense and totally covered with very aromatic and crystalline trichomes. The F1 cross brings more homogeneity and hybrid vigor to the offspring. The cross with the autoflowering genetics shortens the flowering and maturity time of this strain in several weeks.

**Variety SWS42**  
**Indica/Sativa:** 40%/60%  
**Indoor Blooming:** 8 weeks  
**Outdoor Harvest:** late August to early September

**25s** 100 € **100s** 350 € **3s+1s** 15,90 € **5s+2s** 26,50 €

## Black Jack F1 Fast Version®

Feminized and photoperiod-dependent version with an ultra fast flowering of one of the first and most appreciated strains of our catalogue, our SWS01 (Black Jack®). This F1 hybrid is the result from the cross between a selected genetic line of SWS24 (S.A.D. Sweet Afgani Delicious Auto®) and the Jack Herer elite clone used in SWS01 (Black Jack® the original). Just like the original version, this strain produces very potent and productive plants, with strong side branches that are very long and fully loaded with aromatic flowers. The aroma is very sweet and with hints of incense complemented by lemony citrus tones. This version shortens flowering time by one week compared to the original version.

**Variety SWS49**  
**Indica/Sativa:** 50%/50%  
**Indoor Blooming:** 7-8 weeks  
**Outdoor Harvest:** mid September

**3s+1s** 19,50 € **5s+2s** 32,50 €

## Green Poison F1 Fast Version®

Feminized and photoperiod-dependent version of our SWS14 (Green Poison®) now featuring ultra-fast flowering. This is an F1 hybrid resulting from the cross between the elite clone of our appreciated Green Poison and a selected 3rd generation autoflowering genetic line of SWS30 (Green Poison Auto®). This strain is ready to harvest with thick buds all covered with abundant aromatic resin only 6 weeks after the flowering photoperiod begins. The plants have the appearance of Indica-Sativa hybrids, with an exceptionally vigorous growth, very fast flowering and large production of flowers. Exquisite taste and aroma with a sweet intense hint of fruit. This strain is remarkably resistant to mold in outdoor grows, considering that due to its fast flowering the plant succeeds in anticipating its harvest to the period in which botrytis usually attacks.

**Variety SWS41**  
**Indica /Sativa:** 70%/30% **Indoor Blooming:** 6 weeks  
**Outdoor Harvest:** late August to early September

**3s+1s** 22,50 € **5s+2s** 37,50 €

## Cream Caramel F1 Fast Version®

Feminized and photoperiod-dependent version. The most awarded strain from the Sweet Seeds catalog SWS04 (Cream Caramel®) now featuring ultra-fast flowering. This strain is the F1 hybrid which is the result of the cross between an elite clone of our Cream Caramel® and a selected strain of 3rd generation of SWS22 (Cream Caramel Auto®). This version of Cream Caramel® shows a strong hybrid vigor, turning into plants with the usual mainly Indica structure. Shows great homogeneity in all the offspring. The aroma is very sweet resembling caramel, with earthy tones and hues inherited from the Blue genetics that intervenes in the cross of the original Cream Caramel®. This kind of strains are usually the favourites of medical cannabis users. Chemotypes with high THC levels and enough CBD to provide a relaxing and antidepressant effect.

**Variety SWS40**  
**Indica/Sativa:** 90%/10%  
**Indoor Blooming:** 7 weeks  
**Outdoor Harvest:** mid September

**3s+1s** 21,90 € **5s+2s** 36,50 €

## Jack 47 F1 Fast Version®

Feminized and photoperiod-dependent version with an ultra fast flowering of one of the most potent strains of our catalogue. This strain is the result of the cross between a selected genetic line of SWS31 (Jack 47 Auto®) and an elite clone of our SWS08 (Jack 47®). The cross between the autoflowering and the photoperiod-dependent strains originates a photoperiod-dependent genetic that shortens the flowering time by one week when compared with the original version of SWS08 (Jack 47® original). This is a very powerful strain that produces exceptionally vigorous plants with thick buds that get fully covered by abundant resin during flowering. The taste and aroma of this strain is fresh and sweet, with tones of incense and flowers combined with lemony citrus hints.

**Variety SWS51**  
**Indica/Sativa:** 25%/75%

## Big Devil *F1 Fast Version*®

Attending to the request of our friends and clients we introduce the feminized and photoperiod-dependent version of our much appreciated SWS15 (Big Devil Auto®). To develop this variety we used our best Big Devil Auto® selected genetic lines. We have eliminated the autoflower characteristic of the original version of Big Devil Auto® hybridizing these selected genetic lines with an elite clone that features some characteristics that are very similar to the original Big Devil Auto®. The result is a very vigorous plant with an imposing structure and a very high yielder of very dense resin covered buds. This strain develops a strong main stem and long side branches. Preserves the taste and aroma of our original Big Devil Auto® which is very sweet, combined with hints of incense and Skunk.

**Variety SWS48**

**Indica/Sativa:** 35%/65%

**Indoor Blooming:** 8-9 weeks

**Outdoor Harvest:** mid to late September

**3s+1s** 19,90 € **5s+2s** 33,00 €

## Black Jack®

We have crossbred our Black Domina with an exceptional Jack Herer of pleasing and intense aroma similar to the Haze's cathedral incense. The result is SWS01 (Black Jack®), one of our most powerful and productive strains.

This classic strain features great hybrid vigor and it is totally adapted to indoor grows. When planted outdoors, directly in the ground and with enough sunlight, it becomes a resinous hairy monster of about 3 meters of height.

**Variety SWS01**

**Indica/Sativa:** 50%/50%

**Indoor Blooming:** 9 weeks

**Outdoor Harvest:** early October

**3s+1s** 19,50 € **5s+2s** 32,50 €

## Psicodelicia®

This plant is a cross between a clone from the United States and a plant from Nepal whose spiced aromas bring to mind places where coffee is toasted. A mostly sativa plant with a very short flowering period, producing generous buds all full of resin.

The effect is typical of a mostly Sativa hybrid: energetic, clean and exciting. An ideal strain for artistic and creative activities.

**Variety SWS07**

**Indica/Sativa:** 30%/70%

**Indoor Blooming:** 8-9 weeks

**Outdoor Harvest:** late September to early October

**3s+1s** 19,50 € **5s+2s** 32,50 €

## Crystal Candy®

This strain was developed within a special programme of the Sweet Seeds' R&D Department that was focused in the search for curious, exquisite and subtle sweet aromas that evoke aromatic sensations of candy shop. The aroma of this variety is sweet and fruity, with tones of chewing gum and fruit jellies, mixed with hints of acid strawberry and mature melon.

This variety is a big producer of aromatic resin crystals that completely cover the flowers and their surrounding leaves with a very high density of long, large-headed trichomes.

The plants look like indica-sativa polyhybrids, very vigorous and productive, with big buds and long side branches.

**Variety SWS58**

**Indica /Sativa:** 60%/40%

**Indoor Blooming:** 9 weeks

**Outdoor Harvest:** mid to late September

**3s+1s** 19,00 € **5s+2s** 31,00 €

## Cream Caramel®

A synthetic variety which is the result of a three way cross between our best Indicas: BlueBlack x Maple Leaf Indica x White Rhino. The synthetic varieties share with hybrid varieties the goal of obtaining the vigor of a hybrid while providing homogeneity to its offspring.

This classic features a sweet intense taste that is reminiscent of caramel, combined with a hint of earthy flavors inherited from the BlueBlack genetic that intervenes in the cross.

This strain is the favourite of medical cannabis users. Relaxing and antidepressant.

**Variety SWS04**

**Indica/Sativa:** 90%/10%

**Indoor Blooming:** 8-9 weeks

**Outdoor Harvest:** late September to early October

**3s+1s** 24,00 € **5s+2s** 40,00 €

**25s** 100 € **100s** 350 €

1

## Sweet Cheese®

A fusion between two high grade strains: Cheese x SWS01 (Black Jack®). This genetic highlights the virtues of its ancestors bringing a new twist of aromas to the flavor of the Black Jack®. It produces long central buds surrounded by plenty of peripheral buds also long and with a good caliber.

The high yielding, together with a new revolutionary flavor featuring hints of mature and spicy cheese makes SWS19 (Sweet Cheese®) a recommended option for those who seek new flavors and aromas.

Regarding the effects, it is important to remember that we're dealing with the mix of two of the best hitters in cannabis engineering. Strong and long-lasting effect, inducing euphoria and a nice feeling of relaxation.

**Variety SWS19**

**Indica/Sativa:** 30%/70%

**Indoor Blooming:** 9 weeks

**Outdoor Harvest:** mid September

**3s+1s** 14,50 € **5s+2s** 24,00 €

## Green Poison®

This very high yielder is a hybrid with Indica predominance but with long and flexible side branches over which dominate a large main cola. With a vigorous growth and a fast flowering period, this plant is a super-producer of buds starting just a few days after the beginning of flowering.

The aroma of this variety is very intense, sweet, fruity and different from the aroma of the other varieties from the Sweet Seeds catalog. Due to its fast flowering this plant is suitable for growing in humid areas where mold and fungus usually attack.

**Variety SWS14**

**Indica/Sativa:** 70%/30%

**Indoor Blooming:** 7 weeks

**Outdoor Harvest:** mid to late September

**3s+1s** 22,50 € **5s+2s** 37,50 € **25s** 100 € **100s** 350 €

9

## Big Foot

This very potent plant with a great abundance of pistils and massive resin production is one of the most outstanding varieties of the Sweet Seeds catalog. It has an extraordinary aroma, great hybrid vigor and it is a very fast flowering variety. Big Foot is an Indica-Sativa hybrid with a strong main stem, large number of side branches and short internodal distance.

This high yielding strain produces a big main bud and lots of secondary buds on the peripheral branches. The buds are compact and produce copious amounts of extremely aromatic resin.

The aroma and taste of this variety is very intense, dense, sweet and fruity with spicy undertones. The effect is quite potent and can range from euphoria to comfortable relaxation.

**Variety SWS36**

**Indica/Sativa:** 50%/50%

**Indoor Blooming:** 9 weeks

**Outdoor Harvest:** late September

**3s+1s** 24,90 € **5s+2s** 40,90 €

## S.A.D. Sweet Afgani Delicious S1®

Self-pollination of one of our most powerful mothers, a Black Domina selected since 1998. The self-pollination of this super mother produces dense buds covered by abundant resin. This strain features sweet intense aroma and a musky flavor inherited from its afghan ancestors.

This S1 seed allows for a very homogenous offspring regarding the described characteristics. Easy to grow and very resistant to pests and fungus.

**Variety SWS02**

**Indica/Sativa:** 90%/10%

**Indoor Blooming:** 8-9 weeks

**Outdoor Harvest:** late September

**3s+1s** 18,50 € **5s+2s** 30,50 €

11

## Cream 47

Exceptional hybridization of our SWS04 (Cream Caramel®) with our elite clone of AK 47. The result of this cross is a very powerful plant, productive and aromatic. Quite a vigorous plant, it produces strong thick stems and branches. It develops large, dense buds, loaded with plenty of resin. During flowering some plants can acquire some blue, purple and reddish colors. The yield at the end of the flowering period is very high.

The flavor and aroma of this strain is extra sweet and preserves the so much appreciated earthy and humus background, original of our Cream Caramel®.

The effect of this plant is very potent and at the same time very well-balanced, between relaxation and excitement, typical of Indica-Sativa hybrids.

**Variety SWS26**

**Indica/Sativa:** 50%/50%

**Indoor Blooming:** 8 weeks

**Outdoor Harvest:** mid September

**3s+1s** 28,50 € **5s+2s** 47,50 €

## Jack 47®

This super hybrid is the result of the cross between two of the most potent genetics of all time, Jack Herer x AK 47. SWS08 (Jack 47®) is a very productive plant with strong effect that grows with an extraordinary vigor. This allows for big buds with copious amounts of resin. The tastes and aromas of this variety are sweet and fresh, complemented with a lemony hint and tones of incense.

As a result of its genetic freshness and hybrid vigor, this plant adapts very well to every kind of growing techniques. Besides that, it allows for the production of strong and healthy clones that show roots in only 7 days.

**Variety SWS08**

**Indica/Sativa:** 25%/75%

**Indoor Blooming:** 9½ weeks

**Outdoor Harvest:** late October

**3s+1s** 33,00 € **5s+2s** 55,00 €

6

## Ice Cool®

Upgrade of one of our most appreciated plants, developed from a NYC Diesel line. Extremely potent, this high yielder has a super-strong and rare exotic aroma.

A marvelous and wonderful plant with an appearance and bud growth from the Indica side and with an euphoric high, allowing one to discover its cocktail of Sativas present in its broad-based gene pool. The resin production is exuberant. It allows for a psychedelic long-lasting high.

**Variety SWS06**  
**Indica/Sativa:** 40%/60%  
**Indoor Blooming:** 9 weeks  
**Outdoor Harvest:** late September

**3s+1s** 29,30 € **5s+2s** 48,80 €

7

## Sweet Tai®

Fantastic crossbreed between our Súper Tai and an Early Skunk. As a result we have obtained a very tasty, deeply spiced, exotic flavour typical of Asian varieties.

The Early Skunk crossbreeding shortens the blooming period, giving denser and resinous buds and compact structure adapted for indoor growing. Produces a very active cerebral high.

**Variety SWS03**  
**Indica/sativa:** 30%/70%  
**Indoor Blooming:** 9 weeks  
**Outdoor Harvest:** late September to early October

**3s+1s** 17,50 € **5s+2s** 29,00 €

3

## Wild Rose

This is a hybrid of a little known variety in Europe but with a great following in Canada and North America, the "Brothers Grimm": Rosetta Stone with a Hog.

It has a hybrid structure very well adapted for indoor cultivation because of its short flowering. Fresh and citrus aroma with gummy tones and excellent taste. Easy to grow.

**Variety SWS10**  
**Indica/Sativa:** 35%/65%  
**Indoor Blooming:** 9 weeks  
**Outdoor Harvest:** mid October

**3s+1s** 19,90 € **5s+2s** 33,00 €

## Mohan Ram®

This genetic is based on a selection of White Widow crossed with our sweet selection of SWS02 (S.A.D. Sweet Afgani Delicious S1®). The White Widow side provides a fresh, floral and fruity touch to the sweet musk of our S.A.D. Sweet Afgani Delicious S1®.

The result is an ideal plant, mostly indica and with a spectacular production of resin. With a strong and long-lasting effect Mohan Ram® blooms very fast. Easy to grow and with an exquisite aroma.

**Variety SWS09**  
**Indica/Sativa:** 85%/15%  
**Indoor Blooming:** 8 weeks  
**Outdoor Harvest:** late September

**3s+1s** 20,00 € **5s+2s** 33,00 €
